April 20th: A Beloved Tradition

Four Twenty. It is a cornerstone in the cannabis culture and the ensuing celebration has become an undeniable tradition, particularly for us out in Colorado. However, the origin of this commemoration is largely unknown by those who reference it. Ryan Grim of the Huffington Post claims to have followed the trail back to the origin; "420 started somewhere in San Rafael, California in the late '70s. It started as the police code for Marijuana Smoking in Progress. After local heads heard of the police call, they started using the expression 420 when referring to herb - Let's Go 420, dude!" This is half true. He goes on to say that the police code rumor is just a

rumor, although the tradition DID begin in California. Apparently a group of five students, known as the "Waldos" because they hung out by a wall outside of school, coined the term in '71 and it's stuck ever since. The 4:20 reference has been embraced by pop culture. All of the clocks are set to 4:20 in the popular film *Pulp Fiction*. And in 2003 when the California legislature codified the medical cannabis law, the bill was aptly named SB420.

April 20th at 4:20 PM, cannabis consumers now light up around the world. 4/20 is celebrated in New Zealand, Canada and the US!

Why be a legitimate patient? Have you ever in your life received anything free worth having?

Change is upon us! SB1284 is passing. Independent growers may possibly provide medicine for up to 5 patients. If you exceed this amount, you must be affiliated with a dispensary and only grow on their premises. Patients will still be allowed to grow their own medicine. 6 plants total; only 3 in vegetative and 3 in flowering as originally designed.

PATIENTS these regulations will now affect you! It's time to understand the true meaning of a caregiver and how the relationship is supposed to be. We at Trichome Health Consultants have strived to create a proper system that has worked very well so far but these new requirements will limit your options. This can be a very good thing for both the Caregiver and the Patients. For the Caregiver it gives stability allowing for them to have structured growing facilities based on legitimate medical patients. You as a patient, under the new guide line, Will only be allowed to change your caregiver a limited amount of times meaning finding the very best clinic now is in your best interest. Please pay attention to whom you decide to confide your most personal information. The companies you choose should have many aspects that help you decide what is best for your long term care.

Things to pay attention to:

- Location: Is it in a safe area with good visibility and security measures.
- Are the staff educated? Are they professional and do they have compassion for your needs?
- Do they have a good reputation in the industry thus far?
- Is the Dr associated with the Clinic and owner? Because he may not be there in your interest. Also is the Referring Dr a Dr that will be flagged by the state at some point for making improper recommendations. This will highly affect your ability to renew and may even terminate your license when the Dr is sited and disbarred.
- Are the meds of high quality and have they been tested at point for defects like Mold, Fungus, Pesticides, Pest like Spider Mites and Worms and many other harmful or distasteful elements?
- Does the clinic have a large variety allowing for you to find the correct strains for your ailment?
- Do they have medibles that are of quality made for human consumption not made in some dirty dark basement or a trailer home kitchen with cross contaminations like pet hair and dust and general family use dirt like air born germs?
- Do they do things like pay your sales tax for you like Trichome Health Consultants?
- Do you believe they will have the business sense to be here for you long term look around pay attention to how they do what they do. If they are offering free items remember what I said in the header. *Have you ever received anything in your life for free worth having?*
- Do they educate you as a patient and as a consumer to make the right choices and to allow for you to also be empowered to grow for yourself? Trichome Health Consultants offers complimentary on-going grow classes we support and give back to our community.
- Do they have special pricing for indigent care patients?
- Do they offer a medicated restaurant that will deliver your meds and your cuisine right at your front door?

There are hundreds of reasons why Trichome Health Consultants should be your trusted source for proper care and instruction on the use of medical marijuana. Come see for yourself the results of our hard work and then make a true educated decision for yourself or for a family member or for someone that you truly care for.

- No purchases allowed without proper paperwork or your red card.
- Trichome Health Consultants was the first MMJ Dispensary to hold a booth at the Colorado Springs Business Expo 2010. We thank everyone that attended and look forward to seeing you at future events. We appreciate all of you.
- Doctor's appointments are available. Call the THC office at 719.635.MEDS (6337) to schedule an appointment. Renewals for Trichome Health Patients are now only \$75.00.
- Master Grower J Card hosts grow classes free to all Trichome members. Our next class will be focusing on the flowering cycle. All classes are held at Trichome and are hands-on, located at 2117 West Colorado Ave. The class doesn't stop here! All members included in our classes can have personal attention any day, any time. Stop by for details.

Jack Herer 1939 ~ 2010

Summary of the article by John Hoefel of the Los Angeles Times, (Source:Los Angeles Times)

Activist and author Jack Herer passed away on April 15th. He was 70 years old. Herer researched and wrote an exuberant book that became the bible of the movement to legalize hemp, a non-psychoactive strain of marijuana. "The Emperor Wears No Clothes," which was first published in 1985, has sold more than 700,000 copies. In it, Herer wields extensive documentation to ridicule the government's ban on hemp cultivation and to highlight the plant's versatility as paper, fiber, fuel, food and medicine. The book made Herer into one of the most recognizable figures in the marijuana movement and converted him into a pop icon memorialized by a strain of cannabis. For decades, Herer, known as the Emperor of Hemp or the Emperor, crisscrossed the country, rhapsodizing about the wonders of weed.

A Tasting to Toast to!

The tasting went exceptionally well and we at THC would like to thank everyone who attended! It was a great opportunity to get a guided tour of the building, meet our growers and meet other patients. Over 200 people showed up to sample the cuisine from the House of Saigon, Colorado Spring's first medicated restaurant. Candy was provided by Tri-Treats; and "Dixie Elixirs," a THC soda pop, was available for sampling. Couldn't attend? Well don't feel left out because we'll be hosting another tasting/meet-and-greet very soon!

Stoner's Delight Strawberry-Banana French Toast

Prep time - 20 Minutes (makes 2 servings)

- 4 thick slices of bread
- 2 eggs, whisked
- 3 tbs cannabutter
- 4 strawberries sliced
- 1 banana sliced
- 3 tbs honey
- Can of whipped cream
- Salted (or unsalted) nuts

You can use whatever bread is on hand; however, French bread and raisin bread are recommended. Coat bread with whisked eggs and cook in large skillet over medium heat for 3-4 minutes per side or until golden. Add Cannabutter to skillet over medium high heat, add strawberries and bananas and cook 2 minutes, stirring often. Add honey, mix, then top toast equally with fruit mixture. Finish with whipped cream and nuts.
